Our Cloud Services

INFRASTRUCTURE

Providing access to networking features, data storage space, system development.

PLATFORM

A complete environment to easily build, deploy, and manage applications in a short range of time.

APPLICATION

A whole ecosystem of digital solutions for your business needs.

INFRASTRUCTURE

Provide access to network features , data storage space, system development, etc with the highest level of flexibility and management control.

Public Cloud
Built on a multi-tenant environment equipped with high performance storage, and secured by next generation firewall.

Private Cloud
Built on a dedicated single-tenant environment, designed to ensure a high level of security.

Backup
Overcome system failures by a quick and automated restoration of the virtual server.

Data Recovery
Ensuring business continuity by restoring copies of virtual servers to a normal condition.
PLATFORM

A **container-based platform environment** to easily build, deploy, and manage your application.

Our platform allows organizations to innovate more agile, while maintaining a highly available and scalable system.

APPLICATION

We provide a **whole ecosystem of digital solutions for your business needs**, ranging from analytic tools, business applications, communication and collaboration applications, security, and many more.

Use Case

IT Refreshment (IT)

CHALLENGES

- Customer's existing infrastructure performance is not up to date with the newest technology where old device no longer supported by principal, yet IT inversment is very high.

SOLUTIONS

- Refresh old devices with our high performance Private Cloud located in Lintasarta's 3 interconnected Data Center, throught a monthly recurring cost basis.

BENEFITS

- Cost-efficient with Opex model.
- Dedicated and high performance IT infrastructure.
- High data security and availability.
- Fully managed by certified engineer.

Application Development and Environment

CHALLENGES

- Customers want to build a standard ecosystem for application development with ease, fast, and low invesment.

SOLUTIONS

- Lintasarta's Public/Private Cloud is suitable for application development, where all usage is measurable, scalable, and minimum downtime guaranteed.

BENEFITS

- Transparent system performance monitoring.
- Ready-to-use development environment.
- Secure environment with Next-Gen Firewall.
- Cheaper vs ongoing temporary server.

Disaster Recovery

CHALLENGES

- Customer need redudandcy (on VM level) for their system. Redudancy is needed so system can run normally during system failures.

## SOLUTIONS

- A fully managed Disaster Recovery solution located in Lintasarta's Cloud (On-premise solution also available).
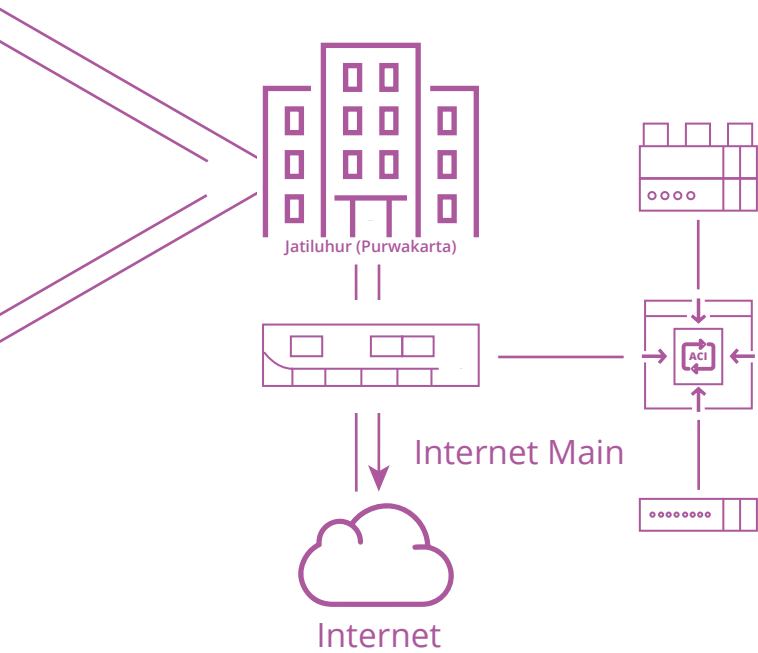

BENEFITS

- Keep application running at all times (even during system failures).
- Minimum downtime with 1 hour RTO and RPO.
- End-to-end solution, include private connection and maintenance.
