Data Communications Services

LINTASARTA IP VPN

VPN

Lintasarta IP VPN (IP Virtual Private Network) provides **reliable and efficient Data Communications to facilitate coordination between a head office and branch offices located in remote areas**. Business coordination can take place indirectly with either customers or mobile staff.

The **vast experience in providing IT and Data Communications solutions** for more than 30 years alongside our **remarkably reliable infrastructure** make Lintasarta the **leading provider of IP VPN services.**

The Lintasarta IP VPN service utilizes a secure and fast IP-based private network with an MPLS (Multi Protocol Label Switch) Wide Area Network (WAN) connection that combines swapping and layer network routing.

FEATURES

- Connection Speed start from 64 Kbps.

- IP Based protocol to end user.

- Multiple Dynamic Routing Support.

- Multiple features support : Auto Failover, Security, Optimization, etc.

- Nationwide coverage with terrestrial and satellite access.

- Network monitoring system for each customer.

LINTASARTA METRO ETHERNET

Lintasarta Metro Ethernet serves **point-to-point and point-to-multipoint connections, enabling companies, such as telecommunications operators, banks and manufacturing businesses**, to reach their branch offices located in some of the country's most remote regions **through Ethernet-based Virtual LAN (VLAN).**

Lintasarta Metro Ethernet acts as a bridge or inter-location hub that connects a customer's LAN based in different geographical locations. The Metro Ethernet Network provides these services by using Ethernet protocol as a WAN (Wide Area Network) in the same way that a LAN uses Ethernet protocol.

Metro Ethernet services are delivered through a fiber optic infrastructure with **MEF 2.0 Certified Metro Ethernet** backbone, which has up to 100G capacity as well as a remarkably high security level as it is a private network, while also accommodating any-to-any connection.

FEATURES

- Bandwidth with speeds between 1 Mbps - 100 Gbps.

- Point to Point (P2P) connection called an E-Line (VLL/Virtual Leased Line) network.

- Point to Multipoint (P2MP) connection called an E-Tree network.

- Support QinQ and Jumbo Frame.

LINTASARTA LEASED LINE

Lintasarta Ethernet Leased Line **guarantees smooth connectivity from one location to another, trimming down operating expenses, particularly transportation costs**. Lintasarta Ethernet Leased Line ensures effective communication within a company, which will positively impact on its business continuity.

The fiber optic infrastructure, which is supported by **Next Generation SDH (Ethernet-Over-SDH) technology**, has an impressively high capacity, enabling secure point-to-point communication. This service also employs **Clear Channel technology** and can facilitate any communication protocols as well as various types of applications.

SPECIFICATIONS

- Lintasarta Ethernet Leased Line Layer-1.

- Bandwidth with speeds between 2 Mbps - 1 Gbps.

LINTASARTA IP VSAT

Lintasarta IP VSAT represents the best solution for finance and energy companies, banks, government institutions and others which **need a stable connection and plan to establish communications** with their offices in many diversely located regions.

For companies that run mobile services, we also offer the **VSAT Nomadic solution for establishing uninterrupted Data Communications** even in the most remote areas.

FEATURES

- Uses broadband satellite technology.

- IP-based protocol to end user.

- LAN Ethernet Interface.

- Connection speeds of 64 - 256 Kbps with up to six voice channels.

LINTASARTA SCPC VSAT

Using satellite as an access medium and **Single Channel per Carrier (SCPC) technology**, our Data Communications service guarentees stable and fast connections with dedicated bandwidth. The service accomodates **point-to-point as well as point-to-multipoint services**.

Be it for data, voice, image or video communications, Lintasarta SCFC VSAT technology enables companies to reach their customers or hold coordination meetings with their representative offices in many regions throughout Indonesia, eliminating distance issues between the head office and branch offices.

FEATURES

- Data rate at 64 Kbps - 5120 Kbps or more.

- Clear channel configuration through which a communication protocol such as Metro Ethernet can run.

- Full duplex configuration with modulation: QPSK/8PSK/8 APSK/16QAM.

Internet
Services

LINTASARTA DEDICATED INTERNET

24 Hours

Lintasarta Dedicated Internet is a domestic and international Internet access service using a dedicated connection. This service is available in a range of packages, each of which can be tailored to suit the customer's specific needs.

INTERNET NAP

24-hour a day non-stop Internet service for wholesale or Internet Service Providers (ISP).

- International access with an international port ratio 1:1.

- Multiple IP Transit Tier 1 connection.

- Multiple and redundant IPLC path.

- Routing protocol using BGP.

- Realtime Traffic Monitoring system with High Capacity upstream.

INTERNET IIX

A 24-hour a day domestic Internet service restricted to accessing the national network and designed for customers whose business activities only require national access.

- High capacity domestic exchange at IIX and OIXP.

- Redundant network for high availability.

- Multiple CDN for low latency access.

INTERNET PREMIUM

24-hour a day non-stop Internet service with a range of service levels, for companies that need a connection with a dedicated line.

- International access with an International port ratio of 1:n.

- Access to Domestic Peering 1:n.

- Realtime monitoring system.

VSAT XPRESS

An Internet service using satellite which is able to reach each and every part of the nation, VSAT Xpress is designed for small and medium scale customers or corporations requiring an Internet connection with a dedicated line.
