

Lintasarta Participates in Supporting Data Communication Network Connectivity at G20 Indonesia 2022

Jakarta, 23 November 2022 – The G20 Indonesia 2022 event has been a success involving G20 member countries and guest countries. **Lintasarta** takes part in supporting data communication network connectivity used by various essential sectors in the G20.

"The G20 in Indonesia this year coincides with many important world-scale moments; starting from the rise of the global economy after the pandemic to the endemic of Covid-19, to the transition towards the era of digital transformation. There are many important issues discussed at this event by domestic and foreign stakeholders, so the quality of the data communication network is very important to maintain," said **Zulfi Hadi, Delivery & Operation Director Lintasarta**.

With the holding of the G20 Indonesia 2022 summit on November 15-16, the high demand for data communication networks can be anticipated by the government and all its supporting partners. The Ministry of Communication & Informatics (Kominfo) is one of them increasing the speed of 4G cellular internet, facilitating 5G network expansion, arranging air cables, and preparing backup networks as part of network infrastructure readiness.

As one of the partners trusted to provide a data communication network during the event, Lintasarta is also involved in supporting all the main and supporting infrastructure to ensure the smooth running of the data communication network at the G20 Indonesia 2022 series of events, including at the G20 Summit summit.

The support provided by Lintasarta includes improving the quality of data communication network infrastructure around the G20 venue in Nusa Dua Bali, increasing bandwidth capacity, providing backup devices in anticipation of disruptions and cooperating with relevant stakeholders, especially air transportation, navigation and airport operations. Lintasarta also relocated the aerial cable on the SJUT Sp. route. Siligita - Kempinski with a total cable length of 18,475 meters.

"The G20 event has been eagerly awaited by many stakeholders and the public considering the many important guests of the 2022 G20 Indonesia who have come from various countries. "Hopefully, with the holding of the G20 series of events in Indonesia up to the G20 Summit, we can continue to provide reliable services to meet the high demand for data communication networks, even after the G20 series of activities have taken place," concluded Zulfi.
